Hantz Peter B. Thermoris

Data Scientist | AI Engineer (LLM)

contact@hantzthermoris.com | linkedin.com/in/hantz-peter-b-thermoris | hantzthermoris.com | dev.to/hantz_peterthermoris_f64

Summary

Data Scientist and AI Engineer specializing in LLMs. Since 2022, designing and deploying machine learning models to production: anomaly detection on billions of bank transactions, NLP, recommendation systems. Since 2025, LLM systems: RAG decision engines, multi-agent pipelines and agent harnesses, with human review. Previously six years in systems and network administration.

Technical Skills

Generative AI: LLMs, RAG (Retrieval-Augmented Generation), agents (LangGraph), agent harness, MCP, prompt engineering, fine-tuning, vector databases
Machine Learning: scikit-learn, TensorFlow, NLP, deep learning, anomaly detection, classification, regression
Data Engineering / Big Data: PySpark, Spark, Hadoop, Hive, Polars, SQL, AWS Glue, S3
MLOps / DevOps: MLflow, FastAPI, Docker, Kubernetes, Git, GitLab, Azure DevOps
Programming: Python, SQL, Java, Bash, Kotlin | **Cloud:** Microsoft Azure, AWS | **Data Visualization:** Power BI, Streamlit, Dataiku
Industries: banking, trading and investment, luxury, real estate, consulting

Professional Experience

Data Scientist | StarClay — 04/2026 – Present

H-Cleanser-ERP, an AI data-cleaning platform for the luxury sector

- Designed a **multi-agent** pipeline (Explorer, Analyst, Enricher, Curator) orchestrated with LangGraph, running on Google Gemini or local models via Ollama.
- Designed the **agent harness**: MCP server of data quality tools, persistent human-in-the-loop approval and audit log for GDPR compliance.
- Asynchronous large-scale processing (Celery, Redis, Polars) and containerized stack (FastAPI, PostgreSQL, Docker).

Data Scientist | Trading & Investment, private group — 05/2025 – 11/2025

- Built a **RAG** decision engine on Phi-3-mini (Amazon Bedrock) synthesizing news, technical indicators and financial reports, with sentiment extraction (few-shot, chain-of-thought): **+40% return over 7 months**.
- Automated ingestion (AWS Lambda), low-latency real-time architecture and stress tests under high-volatility regimes.

Data Scientist | Xpert Consulting, client: La Banque Postale — 10/2023 – 03/2025

- Unsupervised anomaly detection (**Isolation Forest, Bisecting KMeans**) on billions of transactions with Hadoop and PySpark, for banking compliance.
- Multi-model approach reducing false positives: **alert conversion rate of nearly 20%** on certain scenarios.
- Workshops with business owners to turn compliance requirements into detection scenarios and specifications; PySpark pipelines and Dataiku dashboards.

Data Scientist (Web Specialist) | Reflexe, remote — 03/2023 – 10/2023

- NLP chatbot for lead qualification, property recommendations based on user behavior (BERT, Random Forest), web scraping and market dashboards.

Data Scientist | Capgemini — 03/2022 – 09/2022

- AI and accessibility R&D: translated French **RGAA** accessibility criteria into automated web page audit rules; web scraping (Selenium, BeautifulSoup), Streamlit, Power BI.

Systems and Network Administrator | CRC Sogema (FIPCA project) and SMEs — 11/2013 – 08/2019

- Linux and Windows Server administration, high-availability network infrastructure, SQL databases, automation and level 2/3 support.
- Rebuilt the VoIP phone system: **dropped-call rate cut from 60% to 2%**.

Education

Master's in Artificial Intelligence & Data Science, IA School, France — 2022
Master's in Electronic Engineering (Computing & Telecommunications), State University of Haiti — 2013

Certifications

AWS Certified AI Practitioner — 2025
Microsoft Certified: Azure Data Scientist Associate, Power BI Data Analyst Associate, Azure Fundamentals, Azure AI Fundamentals

Languages

French: native | English: fluent (C1)
